PREFACE

On behalf of the Conference Committee, I would like to extend a warm welcome to all the participants and attendees of the Fourteenth Annual Meeting of the Polymer Processing Society, PPS-14 held in Yokohama, Japan. The PPS-14 will consist of 2 plenary lectures, 3 invited lectures, and more than 400 presentations including 100 posters. With participants from 27 countries all over the world, PPS-14 is literally an international conference. I believe participants and attendees will be able to obtain valuable information through the presentations of researchers and engineers most active in their fields.

The Conference Committee deeply appreciates the cooperation of the Japan Society of Polymer Processing and the Society of Rheology, Japan, the cosponsoring societies. We would also like to express our gratitude to all those who have worked hard to make this conference a success. We are particularly grateful to all the participants who have traveled far distance to attend this meeting. We hope you will have a pleasant and exotic stay in Yokohama and other places of Japan you will be visiting, and that you will enjoy the conference programs.

THE POLYMER PROCESSING SOCIETY (PPS)

The PPS was founded in March, 1985 in Akron, Ohio, USA. The goal of the PPS, as embodied in its constitution, is to foster scientific understanding and technical innovation in polymer processing. In addition to annual conferences, PPS activities include the arrangement of regional and local meetings in various parts of the world, publication of the journal "*International Polymer Processing*", and sponsorship of educational seminars. Membership is open to all individuals who feel the activities of the society will advance their professional development. Members will receive the Journal, *free of charge*, and be given the privilege of attending meetings at reduced fees. The annual membership fee is \$80US for 1998.
