PREFACE

The concerted effort of the Symposia Organisers helped us in putting together an interesting programme for the Eighth Annual Meeting of the Polymer Processing Society (PPS-8). The technical programme has been divided into twelve symposia. Each symposium has one to three Keynote lectures and several oral as well as poster presentations. There is a total of 21 Keynotes lectures, 152 oral presentations and 48 posters. The extended abstracts of almost all the papers are presented in this Book of Abstracts. The abstracts have been arranged according to symposium numbers. The numbering system of the papers is according to the sequence of presentation during the conference. An author index has been included at the end. We would like to thank several of our colleagues at the National Chemical Laboratory, Pune and Indian Institute of Technology, Delhi who have made our task easier in compiling this volume.

We take this opportunity to thank all the authors for their contributions and for making PPS-8 a successful forum for interaction between scientists who would exchange research results and technical information related to various aspects of polymer processing.

THE POLYMER PROCESSING SOCIETY

The Polymer Processing Society (PPS) was founded on March 28-29, 1985 in Akron, Ohio (USA). The audience of the Founding Meeting, more than 200 experts from all over the world, of both industrial companies and universities, enthusiastically approved the objectives of the new society.

The goal of the PPS, as embodied in its constitution, is to foster scientific understanding and technical innovation in polymer processing by providing a discussion forum for the world-wide community of engineers and scientists in this field. The thematic range of the PPS encompasses all formulation, conversion and shaping operations applied to polymeric systems in the transformation from their monomeric forms to commercial products.

Membership in the PPS is open to all research workers in the field, and to all individuals who feel the activities of the society advance their professional development. The benefits for members consist of obtaining the official PPS journal, International Polymer Processing, free of cost, and in the opportunity to attend the Annual Meetings for a reduced fee.

The annual meetings of PPS are held at locations in the three geographic regions, namely, America, Europe and Asia. Other PPS activities include the arrangement of regional and local meetings, publication of a journal, and sponsorship of educational seminars.

At present, the annual membership dues amount to US \$ 50. The payment may be sent to the following address for becoming a member:

POSTER PRESENTATIONS, ROOM I-B, MAIN CONVENTION HALL, FIRST FLOOR

FRIDAY MARCH 27

- P7-24 Compatibilization of polycarbonate-polyethylene blends
N.Mekhilef, A. Ajji, A.Ait-kadi, Univ. of Laval, Canada
- P7-25 Structure and properties of bisphenol A polycarbonate/poly (ethylene-co-acrylic acid) blend
L. Cai, Xi Xu, Chengdu Univ., China
- P7-26 Morphology-Melt rheological properties correlation in polymer blends
A.K. Gupta, K.R. Srinivasan, B.K. Ratnam, Indian Institute of Technology Delhi, India
- P7-27 A study on crystallization kinetics of blends of polypropylene with polyethylene
C. Yanmo, Z. Meifang, Z. Yu, W. Yuzhen, China Textile Univ.;
J. Luo, D. Xu, X. Li, Acad. Sci., China
- P7-28 Studies on nylon-6/polypropylene blends
R. Rajesh, S. Muralikrishnan, K.S. Jagadeesh, S.J. College of Engineering; Ravishankar, Sri Ram Fibers, India
- P7-29 HDPE/Nylon 6 blends to enhance the barrier resistance of blow moulded products
P. Poomalai, A.P. Das, J.S. Anand, CIPET (Madras), India
- P7-30 Investigation of multiphase polymeric systems of poly (vinyl chloride): PVC/chlororubber-20-g-(ethyl acrylate-co-acrylonitrile (2:1) and PVC/chororubber-20-g (styrene-co-vinylacetate-co-acrylonitrile (1:1:1)) blends and their relative performance
Y.P. Singh, GSFC; S. Shaw, Cosmo Films; R.P. Singh, Indian Institute of Technology (Kharagpur), India
- P7-31 Miscibility behavior of natural rubber-ethylene-vinyl acetate co-polymer blends
A.T. Koshy, S. Thomas, Mahatma Gandhi Univ. (Kottayam);
B. Kuriakose, S. varghese, Rubber Research Inst., India
- P8-32 Effects of surface treatments on the properties of a one polymer composite: interfacial behaviour & strength
A. Rochette, A. Ajji, R.E. Prud'homme, Univ. of Laval, Canada
- P8-33 Short glass fibre reinforced composites based on Nylon 6 & ABS blends
K. Kannan, A Misra, Indian Institute of Technology Delhi, India
- P8-34 Modification of diglycidyl ether of bisphenol A(DGEBA) epoxy resin with carboxy terminated butadiene (CTBN) to enhance its toughness
U.K. Saroop, Shriram Institute for Industrial Research, India
- P8-35 Barium ferrite-polymer magnetic composites
Diana Andrei, Georgeta Andrei, ICECHIM, Analytical Department, Bucharest, Romania
- P8-36 Internal Stress in mica-filled epoxy resin
C. Brahatheeswaran, CIPET;
V.B. Gupta, Indian Institute of Technology Delhi, India
- P8-37 Electromagnetic interference (EMI) shielding effectiveness of electrically conductive polychloroprene filled with short carbon fibre
P.B. Jana, S.K. Dey, Indian Institute of Technology Kharagpur, India

V.B. Gupta, Indian Institute of Technology Delhi, India
- P8-37 Electromagnetic interference (EMI) shielding effectiveness of electrically conductive polychloroprene filled with short carbon fibre
P.B. Jana, S.K. Dey, Indian Institute of Technology Kharagpur, India

- P8-38 Ultrasonic investigation of multiphase polymeric systems and composites
R.P. Singh, Indian Institute of Technology Kharagpur, India
- P8-39 Mechanical properties of PP/Jute-fibre reinforced composites compared to PP/glass-fibre composites: Effect of moisture absorption on tensile strength.
*D. Basu, A.N. Banerjee, Univ. of Calcutta;
A. Misra, Indian Institute of Technology, Delhi, India*
- P8-40 Physical and mechanical properties of short sisal fibre reinforced polyethylene composites.
*K. Joseph, S. Thomas, Mahatma Gandhi Univ;
C. Pavithran, Regional Research Laboratory (Trivandrum), India*
- P8-41 Stress relaxation behaviour of short sisal fibre reinforced natural rubber composites
*S. Varghese, B. Kuriakose, Rubber Research Institute of India;
S. Thomas, A.T. Koshy, Mahatma Gandhi Univ. (Kottayam), India*
- P9-42 Liquid crystalline properties of random & ordered copolymers
P.K. Kaicker, S. Tyagi, J.P. Singhal, R.K. Goyal, Shriram Institute for Industrial Research, India
- P9-43 Studies on fiber formation of thermotropic copolymers
S. Mehta, B.L. Deopura, Indian Institute of Technology, Delhi, India
- P9-44 Polyacetylene: some ways of increasing the stability of its properties
G.P. Belov, D.G. Belov, G.I. Kozub, Institute of Chemical Physics (Moscow), Russia
- P9-45 Composition based on polyethylene and polyacetylene
V.N. Noskova, P.E. Matkovskii, G.P. Belov L.N. Raspopov, Institute of Chemical Physics, Russia
- P9-46 Fibre spinning of liquid crystalline polymers: A steady state and linear stability analysis
S.Ramalingam, R.C. Armstrong, Massachusetts Institute of Technology, USA
- P10-47 Porous biaxially drawn UHMW-PE films
H.M. Fortuin, DSM Research BV, The Netherlands
- P12-48 Modelling of the dynamics of freon-11 blown polyurethane foam formation
S.A. Baser, D.V. Khakhar, Indian Institute of Technology, (Bombay), India
